1. EUPHA update

EUPHA is excited to announce two new institutional members.

Luxembourg Institute of Health

[Luxembourg Institute of Health](#) is a public biomedical research organisation. Striving for excellence, its researchers, by their creativity, enthusiasm and commitment, generate knowledge on disease mechanisms and contribute to the development of new diagnostics, preventive strategies, innovative therapies and clinical applications that impact the healthcare of Luxembourgish and European citizens.

Italian National Agency for Regional Health Services (Agenas)

[The National Agency for Regional Health Services \(Agenas\)](#) is a public agency founded in 1993 as a technical-scientific body of the Ministry of Health. The objectives of the Agency are essentially to promote innovation and quality in health care, to perform comparative analysis of the cost and effectiveness of the services offered to the public and to provide technical support to the Ministry of Health (MoH) and the Regions. The Agency also participates in several projects co-financed by the European Union and coordinates health research programs financed by the Ministry of Health.

EUPHA calls upon institutional investors to disinvest from the tobacco industry

The tobacco industry manufactures a product that will kill half of those who use it in the way that is intended. Many institutional investors continue to invest in the tobacco industry. EUPHA believes that such engagement with the tobacco industry is futile. We see no evidence that the industry has changed its ways. Following the success of [Tobacco Free Portfolios](#) in Australia, we call upon institutional investors in Europe to follow the lead of a growing number of investors in Australia and publically disinvest in this disreputable and ultimately doomed industry. Read the Press Release [here](#).

EUPHA calls for the widespread adoption of sugar taxes in Europe

EUPHA enthusiastically welcomes the decision by the United Kingdom government to implement a tax on sugar sweetened beverages, adding to the welcome already expressed by our member organisation, the UK Faculty of Public Health. EUPHA calls upon European governments to follow the approach taken by the UK government, as part of a comprehensive strategy against obesity and encourages the European public health community to learn from those activists in Berkeley who were so successful in standing up to powerful vested interests. Read the Press Release [here](#).

We encourage our member associations to distribute the press releases in their own countries.

6th European Conference on Migrant and Ethnic Minority Health, EUPHA MEMH 2016

Oslo, 23-25 June 2016

Theme of the 6th European Conference on Migrant and Ethnic Minority Health is '**Equity – the Policy Practice Gap**'. Plenary sessions and presentations will focus on socio-demographic and political determinants for health and the policy environment with relevance for migrants, ethnic minorities, asylum seekers, refugees, undocumented migrants. Other topics include: access and quality of health care services; disparities and inequities, social exclusion and marginalization, health system responsiveness to diversity empowerment and levers for change, etc.

More information: [EUPHA MEMH 2016](#).

2. European Public Health Conference

9th European Public Health Conference: All for Health, Health for All Austria Centre Vienna, 9 - 12 November 2016

The theme for the 9th EPH Conference is 'All for Health, Health for All'. Plenary sessions with speakers from around the world focus on:

From Ottawa to Vienna: 30 Years of the Ottawa Charter: celebrating the 30th anniversary of the Ottawa Charter. Where are we now and where should we go?

Health for All: highlighting the importance of good health and access to health care for all.

All for Health: looking outside the traditional fields of public health. Are other fields aware that their work has an impact on health?

Health Technologies: E-health, telemedicine, health apps, smart watches, ambient assisted technology and living. Where does that lead us?

Achieving Health in Fragmented Systems: exploring the relation between new forms of work, social solidarity, health insurance and health promotion.

Registration

[Registration](#) for the 9th EPH Conference opens 1 March 2016. You can benefit from early bird registration fees until 1 September. We are expecting over 1,200 delegates. Meet your colleagues at the largest public health event in Europe and register early to benefit from the reduced rates.

Early bird registration fees for EUPHA and ÖGPH members are EUR 600. Non-members pay EUR 680, Early career professionals pay EUR 420 (all including VAT).

Preconferences can be booked online once the preconference programme is completed in May. At all times they can be added to your earlier made registration by contacting us at registration@ephconference.eu.

Abstract Submission open until 1 May

Abstract submission does not have to be confined to the conference theme 'All for Health – Health for All'. Abstracts are invited for workshops, oral presentations, pitch presentations and posters. Prizes will be awarded for the best oral, poster and early career professional's presentation. Do not miss the opportunity to be recognised for your hard work. Abstracts and workshop proposals can be submitted [here](#).

3. EUPHA members update

EUPHA Research Lead Peter Groenewegen appointed as co-director of the Observatory Venice Summer School 2016

EUPHA Research Lead and senior researcher at NIVEL, The Netherlands, Prof Peter Groenewegen has been appointed as co-director of the Venice Summer School. This year's theme is: "Primary health care: innovating for integrated, more effective care" and it will be held from 24 -30 July 2016 at Isola di San Servolo, Venice, Italy. Building on participants' own knowledge and expertise, the Summer School will systematize and interpret primary care reform innovations and their implementation, provide tools to assess the performance of primary care systems, address how integrative and integrated primary health care systems can serve whole populations and address the integration between health care/public health and social services.

CFHI and EUPHAnxt partnership

Following the appointment of Director of European Engagement in August 2015, Child Family Health International (CFHI) and EUPHAnxt, the student and young professional association of the European Public Health Association, have partnered to bring ethically-based global health educational internships to European students and young professionals in the field of public health

<http://www.prweb.com/releases/2015/12/prweb13145134.htm>

4. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health. The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2014, the impact factor of the journal is at 2.591. The 5-year impact factor is 2.512. The EJPH is the official journal of EUPHA.

5. Call for proposals, job opportunities

Call for interest for European Reference Networks

A call for highly specialised healthcare providers to establish European Reference Networks (ERNs) has opened and will run until **21 June 2016**. For relevant information and documents go to

http://ec.europa.eu/health/ern/implementation/call/index_en.htm

DG SANTE is organising an **info day** on **7 April 2016** to help candidates with the technicalities of the call for interest for ERNs and call for grants. The event will take place in Brussels on **7 April 2016**. As places are limited and priority will be given to potential candidates, interested stakeholders are invited to follow the event online. The web streaming link will be announced on the [event's web page](#) at the beginning of April.

Call for commitments of the European Innovation Partnership on Active and Healthy Ageing

The Call for Commitments of the European Innovation Partnership on Active and Healthy Ageing (EIP on AHA) is now open.

Organisations involved in developing, promoting or deploying innovative solutions for active and healthy ageing are kindly invited to register an account and submit projects to be implemented in the coming three years. The commitments are organised within action groups and must be in line with the overall priorities of the EIP on AHA.

The call will be open until **Friday 15 April 2016**. For further information, please see the [FAQ page](#) or visit the EIP on AHA dedicated [portal](#).

Call for abstracts Cross-cutting Informal Care and Professional Primary Care

Riga Latvian Society House, 5/6 September 2016

The conference scientific committee invites submissions of abstracts for presentations related to the scope and purpose of the conference.

<http://www.euprimarycare.org/riga/call-abstracts>

World Federation of Public Health Associations

The World Federation of Public Health Associations (WFPHA) invites member national public health associations in good standing to submit a bid to host the WFPHA's 16th World Congress on Public Health in 2020.

The deadline for submitting a bid is October 31, 2016. Please complete and return the completed 2020 Congress Bid template along with a provisional budget to the WFPHA Geneva office by email:

eleonora.decata@wfpha.org

<http://www.wcph2017.com/>

Professorship for Public Health, University of Bremen

University of Bremen, faculty of human and health sciences, Institute for Public Health and Nursing Research, offers a professorship for Public Health with a focus on health promotion and prevention

<http://www.uni-bremen.de/en/berufungsverfahren.html>

postdoctoral researcher, University of Porto

The Institute of Public Health, University of Porto (ISPUP), in Porto, Portugal is looking for a postdoctoral researcher within the scientific area of Health Services Research.

CALL START AND FINISH DATES:

22nd March to 4th April 2016.

For further information, please click [here](#).

6. Interesting news

ASPHER 50th Anniversary

This year marks ASPHER's 50th anniversary will culminate in ASPHER's Annual Retreat to be held in Athens, 25 - 27 May. This will be a wonderful occasion to reflect on ASPHER's incredible fifty year history, and to start planning the next half century! We hope all ASPHER members will be present.

More info will be available at <http://www.aspher.org> and will follow on a regular basis throughout the year, updating everyone on upcoming events.

ARNA final conference

[Towards more prudent use of antibiotics in the European Union](#)

Associated event of the Dutch Presidency of the EU

June 17 2016, Media Plaza, Jaarbeurs, Utrecht, the Netherlands

LEPH2016: EUPHA President to be a keynote speaker.

Renowned for his expertise in, and contribution to European public health, EUPHA's President **Martin McKee** will be addressing the 3rd International Conference on Law Enforcement and Public Health (LEPH2016). The conference will be held at the Meervaart Centre, Amsterdam from 2 - 5 October 2016. More information about the invited speakers go to www.leph2016.com/program/invited-speakers/ To secure your place in the program you must submit an abstract on line at www.leph2016.com/program/call-for-abstracts Abstracts close on 14 April. Learn more about LEPH2016 and register at www.leph2016.com

Kick-off meeting of the third HTA Joint Action

The kick-off meeting of "EUNetHTA 3" (2016-2019) – the third Joint Action which aims to pave the way for sustainable cooperation on Health Technology Assessment (HTA) in Europe took place in Amsterdam on 3 March 2016. Building on achievements of the previous two, the specific objective of this Joint Action, which will include 75 partners from 27 EU countries, is to strengthen cooperation between HTA bodies in the EU and increase and improve joint work. Participants to this meeting included representatives from HTA organisations, academia, patient groups, regulators, physicians and industry. Initial discussions will revolve around the types of barriers to EU cooperation on HTA that are currently encountered and potential solutions for overcoming them.

http://ec.europa.eu/health/technology_assessment/policy/index_en.htm

Spotlight on obesogenic environments

The results of the four-year, EU-funded €3.7m SPOTLIGHT study into measures to prevent adult obesity and the role of the environment have been published. The research consortium developed tools for assessing the obesogenicity of urban environments using Google StreetView and investigated success factors in community level interventions. Details can be found in a summary [Briefing Paper](#), an open-access [Supplement](#) in Obesity Reviews, and a piece on the British Medical Journal [website](#).

Health costs from Balkan coal plants prompt call for EU policy rethink

A new study from the Health and Environment Alliance (HEAL) quantifies the public health costs of polluted air from coal-fired power plants in the Western Balkans at up to 8.5 EUR billion per year. Fumes from these plants contribute to air pollution, which is a serious health risk in these countries. Polluted air is associated with unnecessarily high rates of premature death, chronic lung disease, heart conditions and asthma. HEAL says that Europe's leaders should support countries in the region by encouraging a move away from coal to improve health and tackle climate change. All resources available from [here](#).

2016 European Young Leaders in Global Health Fellowship

Child Family Health International is pleased to offer partial scholarships for select program dates. Since 2007, we have provided CFHI Global Health Scholars with more than \$100,000 in scholarship funding. CFHI is committed to working globally and addressing inequities. In line with this global lens, it is our policy to actively seek a diverse pool of candidates from a variety of backgrounds who are committed to the mission and vision of CFHI.

The scholarship deadline for Spring and Summer 2016 programs has passed. The scholarship application cycle for Fall 2016 programs will open on May 1, 2016.

<https://www.cfhi.org/scholarships>

Zika's link to Guillain-Barre syndrome

During a seven-month outbreak of Zika virus infection that ended in April 2014, health officials in French Polynesia noticed an uptick in the number of patients showing up at hospitals with a rare but dangerous constellation of symptoms known as Guillain-Barre syndrome.

Typically in the wake of a viral or bacterial infection, patients stricken with Guillain-Barre syndrome suffer a sudden onset of weakness, pain and paralysis in their legs and arms. Occasionally, paralysis progresses to the chest, impairing a patient's ability to breathe. Even with access to a respirator and intensive care, some 5% of those stricken by Guillain-Barre die.

Experts make progress towards optimizing diabetes care on a global scale

Diabetes is a significant global health problem, afflicting 382 million people worldwide with increasing prevalence rates and adverse effects on health, wellbeing, and society in general. Experts from around the world have synthesized a core set of recommendations using information from 14 countries as a basis in order to work towards optimizing diabetes care globally -- a critically important initiative to help stem the diabetes epidemic.

<https://www.sciencedaily.com/releases/20...>

Impact of climate change on food production could cause extra deaths in 2050

Climate change could kill more than 500,000 adults in 2050 worldwide due to changes in diets and bodyweight from reduced crop productivity, according to new estimates. The research is the strongest evidence yet that climate change could have damaging consequences for food production and health worldwide.

<https://www.sciencedaily.com/releases/20...>

Early detection: Colorectal cancer rates declining in Germany

The introduction of screening colonoscopy in Germany is showing results: Within ten years of the start of this screening program for the early detection of colorectal cancer, the number of new cases has significantly dropped in the age groups 55 years and over, research shows.

<https://www.sciencedaily.com/releases/20...>

Developing sustainable food cities

The issue of global food security is a problem for us now, and for future generations. Perhaps the most visible issue is malnutrition, which affects millions in the developing world and poses a risk to many vulnerable people in the developed world. But the issue of global food security is much broader than the supply of food – it also refers to the challenges of our dependence on globally imported food, rising food prices, food waste and the provision of a nutritious, balanced diet.
